

## GENERAL HEMATOLOGY DEPARTMENT

- prof. dr hab. n. med. Tadeusz Robak
  - prof. dr hab. n. med. Jacek Trelński
  - dr n. med. Michał Witkowski
  - dr n. med. Magdalena Witkowska
- Phone: 42 689 51 91

Department of General Hematology headed by prof. dr hab. n. med. Tadeusz Robak deals with the diagnosis and treatment of cancer and non-cancerous diseases of the hematopoietic and lymphatic systems.

Thanks to the use of the most modern techniques and the most up-to-date medical knowledge, the Site diagnoses a wide spectrum of diseases, both the most common and extremely rare diagnoses, e.g. acute lymphoblastic leukemia, renal impairment/multiple myeloma, acute myeloid leukemia, chronic lymphocytic leukemia, follicular lymphoma, hodgkin's disease).

The huge scientific potential and experience of the medical staff allows for conducting clinical trials, of which over 160 have been conducted so far in the hematology department.

The commitment of the entire team and cooperation with specialists in other medical fields allows us to adjust therapeutic standards to the individual needs of the patient.

Specialist laboratories operating at the Department of Hematology: Cytology, Flow Cytometry, Cytogenetics, Blood Coagulation Disorders support highly specialized and rapid diagnostics of hematological diseases.
