Clinical trials have been conducted at the Cancer Chemotherapy Clinic since 2002.

Phase II and III trials are mainly conducted in the following diagnoses:

- breast cancer
- prostate cancer
- colorectal cancer
- prostate cancer
- ovarian cancer
- lung cancer
- stomach cancer
- malignant melanoma
- endometrial cancer
- cancer of the lining of the womb

As well as studies evaluating the prevention of nausea and vomiting in patients receiving highly emetogenic chemotherapy.

The Cancer Chemotherapy Clinic is interested in participating in new clinical trials, especially concerning patients with gastrointestinal cancers, gynecological cancers, lung cancer, breast cancer and melanoma.
