

DEPARTMENT OF PROPLETIVE DISEASES

- lek. med. Maja Lisik-Habib
- dr hab. n. med., prof. UM Magdalena Ciężyńska
Phone: 42 689 54 71

The Department treats patients diagnosed with all solid malignancies, in particular with lung cancer, breast cancer, gastrointestinal cancer, cancer of the male and female genitourinary system, head and neck cancer and melanoma.

We offer patients not only standard chemotherapy, but also immunotherapy, molecularly targeted therapy and treatment under all available therapeutic programs of the National Health Fund and experimental therapies as part of clinical trials.

In cooperation with the Department of Teleradiotherapy, the Department also conducts combined treatment - chemoradiation in selected cancers.

Areas in which clinical trials are conducted at the Centre:

- bladder
- skin melanoma
- breast cancer
- small and non-small cell lung cancer
- cancer of the esophagus, cardia or stomach
